

Amendments to the Claims:

This listing of claims replaces all previous versions, and listings, of the claims in this application.

Listing of the Claims:

Claim 1 (original)     A composite set of jewelry ornaments containing decorative elements in the form of settings with stones and a connector with a lock, characterized in that as decorative elements [it] the set contains tubular elements and tubular elements in combination with settings with stones; said tubular elements are provided with one or more cross through openings, said settings are provided with eyeholes or through mounting openings, and the ratio of length to diameter of tubular elements is in the range of from 1/1 to 30/1 and all components of the set are made of precious metals or alloys thereof or plated with precious metals or alloys thereof.

Claim 2 (original)     A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are bent in the form of an arc.

Claim 3 (original)     A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are bent at an angle.

Claim 4 (original)     A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are S-shaped.

Claim 5 (original)     A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are faceted, for example, they may be tri-, tetra-, penta-, hexahedral.

Claim 6 (original)     A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are donut-shaped.

Claim 7 (original) A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are made in the form of paraboloid of revolution.

Claim 8 (original) A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are in the form of a series of spheres having equal or different diameter.

Claim 9 (original) A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are made with polished or mat outer surface or with a combination of both types of surface state.

Claim 10 (original) A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are made with polished outer surface.

Claim 11 (original) A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are made with mat outer surface.

Claim 12 (original) A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are made with a combination of both polished and mat states of surface.

Claim 13 (original) A composite set of jewelry ornaments according to claim 1, characterized in that the tubular elements are made with shaped surface, for example, corrugated surface.

Claim 14 (currently amended) A composite set of jewelry ornaments according to claim 1 [any of claims 1-13], characterized in that the tubular elements are decorated with natural or artificial precious, semiprecious or ornamental stones taken separately or together or in different combinations.

Claim 15 (currently amended) A composite set of jewelry ornaments according to claim 1 [any of claims 1-14], characterized in that the tubular elements are decorated by chasing.

Claim 16 (currently amended)      A composite set of jewelry ornaments according to claim 1 [any of claims 1-14], characterized in that the tubular elements are decorated with an ornament executed with the use of the partitioned enamel technique.

Claim 17 (original)      A composite set of jewelry ornaments according to claim 1, characterized in that the settings with stones contain natural or artificial precious, semiprecious, ornamental stones taken separately or together or in various combinations.

Claim 18 (original)      A composite set of jewelry ornaments according to claim 1, characterized in that the connector is made in the form of a chain, a purl or a thread.
